Wanderground is a newly forming Lesbian Archive/Library for the New England region. We collect materials that describe, portray, or represent the vibrant Lesbian cultures, communities, and spaces between the period of 1950 – 2000.

As a regionally-based archive located in New England, we prioritize and collect personal items from Lesbians who have spent a significant part of their lives in the region. We also hold significant numbers of books and publications from the Women in Print movement as well as recordings from Lesbian musicians and recording companies. Artifacts, memorabilia, and other treasures from our communities have their place in this archive as well.
